

Evonik expands its market position for C4-based products

- Expansion of 1-butene capacity in Marl by 75,000 tons
- Expansion of butadiene production in Antwerp, Belgium, by 100,000 tons
- Expansion of MTBE capacity in Marl and Antwerp by a total of 150,000 tons

Essen-based Evonik Industries is further expanding its market lead in C4-based products and investing in the expansion of its production facilities. The Group's 1-butene capacity in Marl Chemical Park will be expanded by 75,000 tons, making Evonik the No. 1 provider of 1-butene worldwide. In Antwerp, the production of butadiene will be expanded by 100,000 tons, while in Marl and Antwerp the capacity of MTBE will be increased by 150,000 tons in total. The investment will run into hundreds of millions of euros.

The expansions are scheduled to go on stream in 2015.

“With this investment we are expanding our technology leadership and our premier market position in C4 chemistry on a long-term basis. At the same time, we are supporting the growth plans of our customers in Europe and overseas,” said Evonik Executive Board member Dr. Dahai Yu. A sharp rise in the growth rates for 1-butene, butadiene, and MTBE is expected. Evonik already operates world-scale C4 production facilities at its sites in Marl and Antwerp. Some 40 new jobs will be created for the operation of the new plants.

1-butene is principally used as a co-monomer in the production of high-value plastics such as polyethylene. It improves the tensile strength of packaging films, for instance.

Butadiene is used in the manufacture of synthetic rubber. One of the biggest customers is the tire industry.

The fuel component MTBE raises the octane number in gasoline and improves fuel combustion. In this way, MTBE from Evonik also helps to improve air quality.

Evonik is one of the world's leading manufacturers of C4-based products. Its product portfolio includes 1-butene, butadiene, and MTBE, but also isobutene, INA (isononanol), 2-PH (2-propylheptanol), and DINP (diisononyl phthalate).

Company information

Evonik, the creative industrial group from Germany, is one of the world leaders in specialty chemicals. Profitable growth and a sustained increase in the value of the company form the heart of Evonik's corporate strategy. Its activities focus on the key megatrends health, nutrition, resource efficiency and globalization. Evonik benefits specifically from its innovative prowess and integrated technology platforms.

Evonik is active in over 100 countries around the world. In fiscal 2011 more than 33,000 employees generated sales of around €14.5 billion and an operating profit (adjusted EBITDA) of about €2.8 billion.
